Eldon House Display Closures

Eldon House Heritage Site and Gardens will close two rooms to the public for the month of January 2025.

Eldon House will close the Drawing Room and the upstairs display Bathroom for several weeks starting on January 2, 2025. This closure is due to conservation work including plaster repair and painting.

As a heritage house museum, Eldon House aims to preserve its building and collections through regular maintenance and repairs. This closure is part of a larger project with the goal of conserving spaces that have been subject to regular wear.

The rest of the Museum will remain open, and visitors are invited to speak with staff to learn more about conservation work in museums. Both spaces will reopen approximately February 1, 2025.

About Eldon House

Virtually unchanged since the last century, Eldon House is London's oldest residence and contains many family heirlooms, furnishings and priceless treasures of the Harris family, as well as a beautiful 19th-century style garden.
